PROPOSAL DETAILS

This document is a donation proposal to the board of organizations and charities making a difference in the lives of people and preserving our natural resources for the generations to follow.

As a South Africa based Hunting Outfit having almost 100% of our clients from the USA, we have a vested interest in the USA Hunter and as a conservation oriented business, all forms of conservation is important to us, for us in South Africa it is easy to contribute since we have daily hands-on involvement in our conservation efforts.

Our clients spend quite a substantial amount of money on hunting expeditions in Africa and we feel we need to re-invest back into the USA conservation and charity initiatives as well.

To say charity is our sole interest would be dishonest and therefore we want to be upfront from day one, for us as a Hunting Outfit not permanently residing in the USA it is a challenge introducing our service and products into new markets. Due to this the practice what we call "charity marketing" has become a method used by many in the industry.
